Organics Education Event Set for October 25

Farmington, Minn., Sep. 1, 2023 – Organics recycling and composting have become increasingly trendy topics in the past years, but the details and how to get started can seem daunting for beginners. To help Farmington residents learn more about organics recycling, the city is offering a free “crash course” to help residents learn more about how composting works, how it benefits our community, and how you can easily do your part.

“I’m really passionate about the benefits of composting,” says Violet Penman, Solid Waste & Recycling Coordinator, who will be leading the event. “Dakota County residents have an amazing system that’s free and easy to utilize, so I love spreading the word and having even one more resident compost their food scraps!”

The event will take place on October 25 from 7-8 p.m. at the Rambling River Center, 325 Oak Street. No yard, money, effort, or pre-registration required. Attendees will have the chance to win a countertop organics bin.
